Trade Partner Profile

Germany	Trade Partner Rank: 8						
<p>Germany is a federal republic consisting of 16 states, including the free states of Bavaria and Saxony. It is located in Central Europe—bordering the Baltic Sea and the North Sea, between the Netherlands and Poland, south of Denmark. Its capital is Berlin. Slightly larger than Montana, and is the second most populous European country after Russia with 82,329,758 residents.</p> <p>Germany has the fifth largest economy in Europe. It is among the world's largest and most technologically advanced producers of iron, steel, coal, cement, chemicals, machinery, vehicles, machine tools, electronics, food and beverages, shipbuilding and textiles. The country's export-oriented economy has proved a disadvantage in the context of weak global demand.</p>
